ABOUT US

RoadRunners Medical Consultants is a nationally-owned medical consultation firm that provides Corporate Health and Wellness Services to all types of industries including but not limited to those that are safety-critical and/or safety-sensitive.

Our main focus is to assist any business in any industry achieve their business targets by providing cost- effective and innovative solutions to their organizational healthcare challenges.

Our business was founded as a response to the increasing number of premature deaths from preventable lifestyle diseases, workplace accidents and injuries as well as mental, physical and emotional disabilities as a consequence of poor employee health and well-being.

RoadRunners Medical Consultants stands as an ideal partner for any business wanting to interface with business opportunities nationally and globally.

OUR VISION

Our Vision prepares us for Tomorrow. To ‘**Lead and Inspire Change**’ for a better every day for every person, every occupation, every industry.

OUR MISSION

Our Mission shapes our Today. We strive to inspire, motivate and create an innovative approach to advancing health and wellness through education, research, clinical care and social responsibility in achieving our theme.

“Living your Best, Healthy and Happy”

Mental well-being: Not all wounds are visible. We are dedicated to healing the unseen by helping employees overcome mental challenges with the help of our mental health experts.

Physical well-being: We are committed to helping employees’ live life without restrictions by providing access to innovative interventions such as chiropractic care and physiotherapy.

Social & Emotional well-being: Taking care of your social and emotional well-being matters. We strive to empower resilience through employee assistance programs which allows employees to navigate challenging life events when confronted.

OUR VALUES

WE CARE

At the heart of our services is **CARE** – it is the core of everything we do. It reflects our dedication and commitment to safety, clinical excellence and client-focused professionalism in every assessment we undertake.

Competence, Compliance and Clinical Accuracy

“Every decision we make is clinically sound, compliant, and carefully calculated to protect lives and operations”.

Accountability, Accuracy and Assurance

“We take full ownership of our work – every clearance, every report, every risk”.

Risk Reduction, Reliability and Resilience

“We reduce risks before they become incidents, with reliable health protocols and resilient health monitoring”.

Engagement, Empowerment and Excellence

“We engage with respect, empower through education, and deliver nothing short of excellence”.

OUR SERVICES

Specialists in Fitness-to-Drive Medical Assessment of Transport and Heavy Machinery Workforce in Safety-critical and Safety-sensitive Industries.

WHAT WE DO is simple but critical: To ensure the **right person, in the right condition, is in the right seat – every shift, every day.**

MEDICAL FITNESS

01

Pre-Employment Medicals

To evaluate a prospective driver or heavy machinery operator’s physical, sensory and cognitive fitness to safely and effectively perform the tasks of driving and heavy equipment operation.

02

Periodic Surveillance

To monitor driver health to detect emerging or worsening health risks that may incapacitate vehicle control, alertness, endurance or reaction time, ensuring continued medical fitness, early intervention and compliance with safety standards.

03

Return-to-Duty Medicals

To evaluate recovery and readiness to safely resume driving or machinery operation, following illness, injury or incapacity, ensuring any physical, sensory or cognitive limitations are identified and managed accordingly.

04

Drug and Alcohol Screening

To detect and prevent substance-related impairment that could impair safety-critical performance, ensuring fitness for duty and compliance with occupational health and safety standards.

05

Post-incident evaluations

To determine whether a health-related condition such as a seizure, sudden cardiac event, medication side effect or acute fatigue, contributed to a workplace incident, and to ensure medical fitness to continue driving and/or operating equipment.

PHYSICAL FITNESS

01

Biometrics

To screen for cardiometabolic risk factors that may incapacitate driving or heavy equipment operation.

02

Resting Electrocardiogram (ECG):

To detect undiagnosed cardiovascular conditions and prevent sudden catastrophic accidents caused by heart-related incidents such as a heart attack, cardiac arrest or arrhythmia.

03

Visual and Auditory Function Testing

To verify that sensory requirements of the driving tasks are met, ensuring optimal vision and hearing for safe vehicle operation, hazard recognition and effective workplace communication.

04

Musculoskeletal Assessment:

To evaluate functional strength, mobility, coordination and postural tolerance required for vehicle control, hazard awareness and prolonged driving.

05

Task-specific Functional Evaluation:

To objectively assess a driver and/or operator's functional capacity and capability in meeting the physical and environmental demands of the driving task.

PSYCHOLOGICAL FITNESS

01

Cognitive Function Test

To assess mental abilities critical for safe driving and equipment operation and to detect cognitive impairments that significantly increase the risk of workplace incidents/accidents.

02

Emotional and Psychological Wellbeing

To screen for emotional stability, stress tolerance and mental health conditions.

03

Sleep-related Fatigue-Screening

To identify drivers and operators at risk of sleep-related fatigue that may impair safe driving and/or heavy equipment operation, increasing the risk of workplace incidents/accidents.

04

Behavioral Risk Evaluations

To assess behavioural traits – impulsivity, risk-taking, non-compliance and substance-use – key indicators that compromise safe and effective driving performance and equipment operation.

OUR TEAM

Our Team comprises of highly trained individuals skilled in various fields of Corporate Health Medicine.

1. Mental Health Experts
2. Fitness Experts
3. Occupational Health & Safety Clinicians
4. Health Compliance & System Administrators
